

***Rule of Power or Rule of Law? Apex Press 2003, \$22, 265 pp, soft cover***

*Rule of Power or Rule of Law?* examines U.S. undermining of multilateral treaty regimes on nuclear, chemical, and biological weapons, landmines, global warming, and international justice. Updates 2002 report released by the Institute for Energy and Environmental Research and Lawyers' Committee on Nuclear Policy.

*To order, mail in form below or purchase with credit card at [www.ieer.org/pubs/#ruleoflaw](http://www.ieer.org/pubs/#ruleoflaw).*

"A brilliantly conceived and executed study that documents unflinchingly the dangerous descent of the U.S. government into the bottomless pit of global lawlessness. It also illuminates the benefits for citizens and the world of an alternate law-guided approach based on negotiated treaty regimes."

— Richard Falk, Professor of International Law and Practice, Princeton University

"This thoughtful book carefully examines the current disturbing U.S. approach to many multilateral treaties. It is essential reading for diplomats, policymakers and everyone else who is interested in global security as it relates to nuclear, chemical, and biological weapons, landmines, global warming, and international justice."

— Pierre Schori, Swedish Ambassador to the UN

"This book provides a comprehensive overview of how, at a time when Americans are keenly aware of international threats to peace and security, the United States is systematically undermining the International Criminal Court and other mechanisms that would reduce those threats."

— Jayne Stoyles, former Program Director, NGO Coalition for the International Criminal Court

"This study shows that the United States is obligated to reduce greenhouse gas emissions even in the absence of the Kyoto Protocol because of prior treaty commitments made by the first President Bush in 1992. It is a wake up call that unless the United States takes urgent steps to meet its key treaty obligations, the environment and security of its people and the world are in peril. Read this book and act to realize its recommendations."

— Brent Blackwelder, President, Friends of the Earth, USA
